About Hafny

Hafny was established in 2012 by Mr. Li, after having 26 years of experience in product manufacturing and mold design at Hafnium. For over 30 years, Hafnium has been making OEM/ODM products specializing in bike pedals, cranks, and grips for famous brands worldwide.

Mr. Li is extremely passionate about biking. In 2012, he noticed that he couldn't find a single bike mirror in the market that met his expectations. With this, he set off on an endless journey of trial and error to create many bike mirrors for all occasions so that nobody would ever have to settle for less.

One of Mr. Li's first innovations was to use stainless steel lenses in bike mirrors, an industry first. A well polished stainless steel lens mirror is optically clearer than a typical plastic mirror. Not to mention that it uses recyclable material, unlike the plastics you'd find in the competition.

With the growing popularity of high-speed pedal bikes, Hafny was also the pioneer who brought automotive grade anti-glare blue lenses into bike mirrors in 2015. Soon after, the idea of the blue lens using in the bike mirrors was popularly adopted by other competitors.

We are proud of our commitment to innovation and to be one of the top bike mirror companies in the world.
